

September 8th, 2020

RiverPointe Post-Acute communication update related to Covid-19.

We are deeply committed to the health and safety of our residents and staff members. In an effort to provide the most current updates we will be uploading all Covid-19 related updates on our website RiverPointePostAcute.com. We only post updates when there is a change in confirmed positive cases or two or more people exhibiting signs or symptoms.

We communicate daily with CDC, CDPH, and local county health department. They work closely with us to manage Covid-19 mitigation. At this time we have activated our Covid-19 Positive Wing in accordance with our state approved mitigation plan. Residents who have tested positive are being cared for by our special covid-19 designated team who only work in this wing.

Resident and Staff Status

There are currently 25 confirmed, COVID-19 positive residents in our COVID-19 isolation unit. Many of these residents will safely come out of isolation this week. This is an increase of 1 since the last time we conducted weekly response-driven testing.

We had two additional staff members who tested positive. Currently we have 12 team members who are unavailable to work because of a COVID-19 positive test. We are grateful for these amazing caregivers and have been inspired as they come back to work after they have recovered or waited the requisite time because they never experienced signs or symptoms.

Since January 1, 2020, there have been 38 residents and 28 team members who have tested positive for COVID-19.

Thank you for your support and understanding during these challenging times. We are here for you. Please don't hesitate to reach out if you have any questions.

Sincerely,

Steve Baddley, NHA (916) 752-2443 cell phone

Mark Ocampo, DON (916) 512-7125 cell phone
